

# REVERSE BUILD DOUBLE STOREY HOMES WITH BRADFORD RAPIDWRAP

Bradford RapidWrap is a unique patented temporary platform system used to wrap double storey homes in a matter of hours. It is easy to assemble and disassemble onto and off the top plate in timber and steel frame homes.

## Benefits for the Installer

### TIMBER OR STEEL FRAME? NOT A PROBLEM

Bradford RapidWrap can be used on both timber and steel frame homes making it versatile and ready for any job.

### QUICK TO INSTALL, EASY TO DISMANTLE

Bradford RapidWrap only requires the use of two installers to set up and dismantle so double storey wrap jobs can be done in half a day.

Once the ground floor is wrapped as per the usual practice, the Bradford RapidWrap system allows immediate wrapping of the upper level without the need for cumbersome and time consuming ground-based scaffolding which may need to be erected by another contractor.

### TESTED TO HALF A TONNE

The Bradford RapidWrap system has been tested in accordance with the scaffolding safety standard AS/NZS 1576.1:2010 so it can support the weight of two installers at any time. The system is completely safe to use in both timber and steel frame homes when installed as per the installation manual.

## Benefits for the Builder

### THE 'REVERSE BUILD' METHOD INCREASES THE SPEED OF CONSTRUCTION

Using the Bradford RapidWrap system, supply & fit teams are able to 'wrap up' their work early with no need for scaffolding. Once the wrap has been installed on a double storey home, tradies can rough in straight away with the potential to decrease construction times significantly by reducing delays caused by bad weather.

### THE RIGHT WRAP CAN REDUCE POTENTIAL RECTIFICATION COSTS

By completely wrapping a home in Bradford's range of Thermoseal™ and Enviroseal™ products, you can reduce potential rectification costs caused by condensation or weather related damage\*. Bradford RapidWrap makes it easier than ever to wrap any residential home to minimise rectification costs.

\*Brick veneer, lightweight clad and regional climate zones all have a significant impact on the choice of wrap and how condensation is controlled. Always reference the product datasheet or visit [bradfordinsulation.com.au](http://bradfordinsulation.com.au) to make sure the right wrap is selected for the application.

## Safety Warning

To use the Bradford RapidWrap system on any residential home there must be edge protection installed on any exposed upper storey roofs or balconies. If there is no edge protection installed on exposed upper roofs and balconies the Bradford RapidWrap system should not be used under any circumstance.

## RapidWrap Training

Bradford RapidWrap requires operators to work at heights and all users must be fully trained and certified prior to use. Bradford will provide necessary training and certification prior to use.

## CONTACT DETAILS

For more information on the Bradford RapidWrap system, contact CSR Bradford on 1300 850 305 or visit [bradfordinsulation.com.au](http://bradfordinsulation.com.au)

# DOUBLE STOREY WRAPPING IN HALF A DAY

# BRADFORD RAPIDWRAP LETS YOU WRAP A DOUBLE STOREY HOME IN HALF A DAY

ARRIVE ON SITE.

GROUND FLOOR WRAPPED. BRADFORD RAPIDWRAP SET UP ON ON ONE SIDE.

FIRST SIDE OF TOP FLOOR WRAPPED.

TOP FLOOR FINISHED. BRADFORD RAPIDWRAP KIT DISMANTLED.

# QUICK & EASY ACCESS FOR SECOND STOREY WRAPPING

SET UP RAPIDWRAP ALONG HALF A HOUSE IN **1.5 HRS**

The Bradford RapidWrap system is a compact kit that is simple for two installers to set up and dismantle quickly and easily.

Once the RapidWrap components have been laid out around the edge of the building, the system can be easily installed and dismantled around an entire home in under 3 hours.

## HOW TO INSTALL THE BRADFORD RAPIDWRAP SYSTEM

Bradford RapidWrap only needs common, everyday tools to install it safely and securely. The below list of tools and materials required are items found in any tradies tool kit or at your local trade hardware store. Two installers are required to safely and securely assemble the kit during installation. Fully detailed installation instructions are supplied with the Bradford RapidWrap kit.

### FRAMES

The frame brackets are hooked over the second storey framing and screw-fixed to the building structure.

### TOOLS/EQUIPMENT

- 120kg industrial rated ladder
- Handsaw
- Hammer
- Chisel
- Cordless drill
- Socket bit
- 20mm drill
- Gravity locking clamps
- Staple gun
- Safety knife

### MATERIALS

- 14g 50mm batten screws
- 14g 75mm batten screws
- 75 x 50mm length of timber (for use in double frame stud walls)
- Tape
- Staples
- Wall wrap

### PLANKS

Flooring planks are securely clamped into position and safety rail posts are inserted to the frames.

### RAILS

Safety rails are fitted to the posts and return safety rails connected at each end of a run.
